DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest the claimed computed tomography apparatus to wit, one including a measurement unit adapted to receive an examination subject, the measurement unit, in a scan of the subject, generating data values for the subject, a control unit connected to the measurement unit for operating the measurement unit during the scan according to a combination of operating parameters, an image computer supplied with the data values for reconstructing an image of the subject from the data values, the image having an image quality, a user-operable input unit connected to the control unit allowing a user to enter a selected combination of the operating parameters for conducting a user-intended scan, the selected combination, if implemented, causing an image with a user-intended image quality to be reconstructed, and the control unit determining whether the selected combination would produce an impermissible operating state of the measurement unit and, if so, the control unit causing at least one of the operating parameters in the selected combination to be altered to a value which permits the user-intended scan to be conducted while avoiding the impermissible operating state and which produces an image of the subject having an image quality which is not significantly reduced in comparison to the user-intended image quality.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
